Dust Collection Systems Replacing bags/cartridges too often? High pressure drop? Higher removal efficiency required?

Aerodyne SplitStream™ Counter Cyclonic Dust Collector

Designed for applications with abrasive, sticky, fibrous, hydroscopic and granular dusts. Its low profile design is perfect for mounting in confined spaces or to replace existing ductwork ahead of a fabric filter dust collector.

Top 5 to Use a Cyclone Reasons Before a Baghouse

- 1 Increased removal efficiencies
- Longer filter life
- Recovery of product
- Easy maintenance
- Allows baghouses to operate in difficult applications

Aerodyne GPC Cyclone **Dust Collector**

Provides a high-efficiency, compact unit that is available in horizontal or vertical configurations.

Aerodyne Airlocks

- High efficiency models available
- **Increased static for** cyclone addition

Vacu-Valve Fine-free flowing solids

Double Dump Valve Large, fibrous, sticky particulate

Knife Gates & Side Gates Low dust loading applications

Rotary Valves
High volume and low clearance options available

Got Dust? Aerodyne dust collectors solve industrial dust collection problems
